Dispense it only to adults. The amount to be dispensed is not to exceed 24 ounces, one wine bottle, or equivalent quantity. If more is deemed necessiry, application must be made to the Secretary, who will give his order for the same, which will be honored by those in change of disinfectants.

When the supply is getting low, those in change of disinfectants will at once notify the Secretary se that the supply may never fall. METHOD OF USING. Add a teacupful of the disinfectant to a gallon of water in a wooden or earthen utensti, and pour into where in a wooden or eartifen attensit, and pour into the vault morning and evening till all odor disap-pears, spreading the liquid over the surface as much as practicable. A half-pint of the disinfectant sim-larly diluted and used every six to ten days will keep vaults of ordinary size permanently deodor-ized. The addition of six tablespoonfuls of Cal-vert's No. 5 Carbolic Acia at the time of the dishe-fection will make it more permanent, and less quan-

vert's No. 5 Carbolic Acid at the time of the disinfection will make it more permanent, and less quantities of the Zinc-iron be subsequently required.

Ill-smelling drains, gutters, etc., can be similarly deodorized with a weaker solution—a teacupful to a wooden-bucketful of water, sprinkling thoroughly and repeatedly till all odor disappears.

If a vanit be not easily and quickly deodorized, or soon becomes again offensive, it is evidence of an excessive accumulation of excremental matters. It therefore should be emptied without delay, and theroafter deodorization will be easily effected.

From 1843 to 1858 we manufactured Gins at Columbus, Georgia, under the firm name of E. T. Taylon & Co., afterwards Clemons, Brown & Co., and made what was then known as the Taylor Gin. During the year 1858 we removed to this place, where we have been exclusively engaged in manufacturing Gins ever since. Withlong experience, the best labor saving machinery, and skilled workmen, we possess advantages not enjoyed by any their manufacturer in our line for producing the ser work for the LEAST 1 oney.

ROCHESTER'S AN IMPROVED

FEVER, AGUE & LIVER PAD! THE GREATEST REMEDIAL AGENT OF THE AGE.

THE TREATMENT OF THE MANY ILLS TO WHICH THE HUMAN FRAME IS SUBJECT TO, BY absorption, now seems to be the only efficacious and speedy remedy. This new departure from the old method of swallowing nauseous medicines will be halled by thousands with a welcome greeting, because, in the ROCHESTER PAD, is found a pleasant, speedy and sure relief for many diseases.

The most reliable Pad before the public is the result of the scientific knowledge of Dr. S. N. Rochester, long a resident of New Orleans, who has made the subject of YELLOW and MALARIAL FEVER his lifetime study. After careful research into the causes and nature of these diseases, a study of twenty years constant application, and having passed through ten epidemics, the principal ones of which were YELLOW-FEVER scourges, he at last gave to the world the new life giving, heaven-inspiring gift—the Mochester Absorbing Cushios. This Cushion has been found to be the most powerful agent in eradicating or preventing diseases ever known, as has been proven by scientific research and the best testimonials from sufferers in all walks or life. It is a specific for malarial diseases, and cures in a short time torpidity of the liver and enlargement of the spleen.
